

Enhancing tomorrow's leaders through today's efforts.

Use the Talassure360 to actively manage the development of your leaders. Its effortless simplicity doesn't sacrifice quality of information or usability, providing understandable data of the highest integrity.

- » **Create a development plan:** Talassure360 provides leaders with feedback from peers, subordinates and superiors alike. Compiling and analyzing responses provides the clarity to develop a definitive path of continuous improvement.
- » **Receive honest feedback:** When Peers and Direct Reports respond to a Talassure360 survey, they do so completely anonymously. In this way, you can be assured that the results will not be colored by fear of repercussion or hopes of reward.
- » **Foster self-awareness:** By comparing a leader's self-perception with the perceptions of their coworkers, the Talassure360 can highlight gaps to create a better awareness of the leader's response to the needs of his or her colleagues. When perceptions between peers, bosses and the leader align, there is a clear picture of already existing strengths to build upon.

The Future of Workforce Solutions

It's no secret that the higher the quality of your leadership team, the more productive and profitable your business will be. Invest in your business by providing your leaders a launching pad for improvement.

Better leaders mean better business

We've simplified the formula for leadership development.

Every leader is different, and requires a unique approach to his or her development. The Talassure360 survey system uses anonymous feedback from colleagues to provide a uniquely personal experience. By requesting honest responses from coworkers about a leader's performance in each area, you can visually overlap the various perceptions of performance, compare them against each other, and create an actionable plan of improvement for the future.
